

Science in Archaeology a Comprehensive S

ARCHAEOLOGY/MARITIME

"The most comprehensive technical inventory of East Asian shipbuilding and shipwrecks available to date, this detailed analysis refines our understanding of East Asian ship construction."—HANS KONRAD VAN TILBURG, author of *Chinese Junks on the Pacific: Views from a Different Deck*

"Based on original language sources and the remains of numerous wrecked Asian ships from sites dating back hundreds of years, this definitive volume substantially revises our understanding and appreciation of Asian seafaring."
—JAMES P. DELGADO, author of *Khubilai Khan's Lost Fleet: In Search of a Legendary Armada*

"An important contribution to maritime archaeology that sheds new light on a field that has little scientific material published in English."—JOHN N. MIKSIĆ, author of *The Court of Surakarta*

THE INNOVATIVE DESIGNS of Chinese junks and Japanese sailing ships are well known throughout the world, yet thorough research on East Asian shipbuilding traditions has been scarce. In this landmark study, Jun Kimura integrates historical data with archaeological findings to examine a wide array of eleventh- through nineteenth-century ships from China, Korea, and Japan. Kimura presents an extensive data set of excavated coastal and oceangoing ships that traveled the Yellow Sea, the East China Sea, and the South China Sea. A comprehensive review of the excavated Goryeo coastal traders provides insight into the Korean shipbuilding tradition. Detailed case studies of the region include medieval merchant ships and a naval battle site—the Shinan shipwreck, the Quanzhou ship, and the remnants of the Kublai Khan's fleet excavated at the Takashima underwater site. Using travel documents, cargo manifests, iconographic paintings, and other descriptive resources, as well as the archaeological evidence of hull components, ship timbers, and iron fastenings, Kimura provides the most informative compilation of data on excavated ships ever produced for East Asia.

JUN KIMURA is junior associate professor at Tokai University.
