

Guide to Picking Locks (DIY)

Finishing

8. Now gently use the file to make all cuts and remove the black area to shape the pick. Watch the back end of the pick. That side will be used as a tensor. Because both pieces of steel were made equal, you can fit them together as a set (see pictures below) One can operate as a pick or rake and the other can be used to apply torque. You will have a complete set with you all the time.

7. Make sure to round all edges. This will make your tools perfect. Use black sand paper. Use different grits for different tasks.

220 grit - for shaping
320 grit - intermediate step
400 grit - for fine finish
600 grit - to polish

A chop stick is a perfect aid. Move along the pick over the sand paper wrapped stick. (see image)

9. Final sanding. Fold a piece of sanding paper and move the pick in and out. The result should look like the images below.

Because you've made 'pairs' these picks can be carried along easily. Watch the mini pick set in a spring with the safety pin. Don't leave home without it...
