

The Science of Seduction: Towards an evidence-based approach to heterosocial skills training

Seduction

High Quality Content by WIKIPEDIA articles! In sociology, seduction is the process of deliberately enticing a person to engage in some sort of human sexual behavior. The word seduction stems from Latin and means literally "to lead astray." As a result, the term may have a positive or negative connotation. Famous seducers from history or legend include Giacomo Casanova and the character Don Juan. Seduction, seen negatively, involves temptation and enticement, often sexual in nature, to lead someone astray into a behavioural choice they would not have made if they were not in a state of sexual arousal. Seen positively, seduction is a synonym for the act of charming someone — male or female — by an appeal to the senses, often with the goal of reducing unfounded fears and leading to their (sexual) emancipation.
