

Transmitter

A transmitter (or radio transmitter) is an electronic device which produces radio waves with the help of an antenna. A transmitter generates a radio frequency current applied to the antenna, which in turn radiates radio waves. In an FM transmitter, the information is added to the carrier wave. Other articles where Transmitter is discussed: communication: Linear models: five elements an information source, a transmitter, a channel of transmission. A radio transmitter has several functions and one final objective. Briefly, the functions are (1) to generate an RF carrier wave; (2) to amplify the carrier wave; (3) to modulate the carrier wave. Transmitter definition, a person or thing that transmits. See more. A radio transmitter consists of several elements that work together to generate radio waves that contain useful information such as audio, video, or digital data. Transmitter definition is - one that transmits: such as. How to use transmitter in a sentence. transmitter (plural transmitters). something that transmits something (in all senses). an electronic device that generates and amplifies a carrier wave, modulates it. Transmitter is a collaborative curatorial gallery based in Brooklyn, New York, focusing on programming that is multidisciplinary, international and experimental. HC4 HELI-CODER 4. High Power Transmitter. Delivering surveillance video and data to your users has never been easier. With the flexibility of MPEG-2 and H.264, Extron offers a wide selection of HDCP-compliant DTP twisted pair transmitters for digital transmission of video, audio, and control signals up to 100 feet (Buy 1Mii ft LONG RANGE Bluetooth Transmitter Receiver Bluetooth Audio Adapter Wireless Transmitter, Support aptX Low Latency & NFC, Digital Optical). BROAD COMPATIBILITY - Talent Star car fm transmitter works with Bluetooth enabled devices, like iPhone, iPad, iPod, Tablet, Smartphones or MP3, MP4. The TX Powercaster Transmitter broadcasts radio waves in the unlicensed MHz ISM band for remote power and data. Designed for use with .Wall Plate DigitalMedia 8G+ Transmitter , Black Textured View Detail Wall Plate 4K DigitalMedia 8G+ Transmitter , Black Textured View Detail. Seismic transmitters provide a mA DC signal output proportional to the vibration amplitude, and are ideal for applications where a PLC, DCS, or other. The TT3 Trap Transmitter is a tool to remotely control your wildlife traps. No need for continuously checking the trap as you get regular status messages and also. Hamilton Transmitter Series for pH, conductivity and DO measurements combines ease of use and reliability. It has been designed for universal process. We have high-quality and various lineup products which have a lot of sales records in Japan. Terrestrial Digital TV Transmitters. UHF. Low Power DTU-LA Transmitter transmits electronic tax return information directly to the IRS. A bump-up service provider that increases the transmission rate or line speed of.
