

Oil Painting: Materials to Use and How to Paint in Oils, How to Mix Colors and Color Chart (New Editi

Mixing the Primary Colours

The best way to go about learning how to mix colours is to start with the primary colours plus black and white. Later on you can add other colours to your Palette as you will become more comfortable with mixing colours. In the demonstrations below, the size of the coloured circles indicates the approximate proportions used in the mixtures that will create the desired colour.

Primaries

Red

Yellow

Blue

These three Primary colours can produce a great variety of other colours. On this Page I show you some of the different colours that can be created by mixing these primaries. With Oil, White is used to Lighten a colour.

Secondaries --- Orange, Green, Violet

A small amount of Red with much More Yellow, makes Orange.

A small amount of Blue added to much More Yellow, makes Green.

A small amount of Blue added to much More Red, will make Violet.

Combining all Three Primaries

Here is some of the Colours that can be created by combining all three Primaries.

Brown is mostly Red plus a small amount of Yellow and a Tiny bit of Blue

Dark, Cool Gray, add equal amounts of Red and Yellow plus a smaller amount of blue to a large amount of White.

Dark, warm Gray, add equal amounts of Red and Yellow plus a very tiny amount of Blue to a large amount of White.

Grayed Orange, starting with Orange, add a tiny bit of blue plus a small amount of Red and add some White to lighten.

By Ghislain Bonneau at <http://www.ghphotodidactical.ca>

Below is some examples on how you can create a wide variety of colours just by adding a tiny bit of another colour in the mix. Starting with all the same green notice how the green has changed in all the five examples below. 1-adding a little Yellow, 2-adding a lot more Yellow, 3-adding a lot of Yellow plus a little bit of Red, 4-No Yellow, and adding a little Red and some white, 5-No Yellow, and adding a little Blue and some white.

Using This Green
